## HISTORICAL COMPARISON GRAPHS

Pages 7-16 contain graphs for individual tax sources comparing the current fiscal year's actual and projected collections and collections for the three most recent fiscal years. The upper panel on each page presents monthly collections. The lower panel compares actual and expected collections on a fiscal year basis. In the lower panel, the bars prefaced by 'ACT' depict actual collections through the current month of each respective year. The bar prefaced by 'EST' shows that cumulation of the current year's DOR estimate through the current month. DOR's estimates are derived from estimates produced by the REC in December 2013. These estimates are adjusted to make them compatible with DOR's cash collection figures.
